6. “Council” means the city council of Clarksville, Iowa.
7. “County” means Butler County, Iowa.
8. “May” confers a power.
9. “Measure” means an ordinance, amendment, resolution or motion.

1.03 CITY POWERS. The City may, except as expressly limited by the Iowa Constitution, and if not inconsistent with the laws of the Iowa General Assembly, exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges, and property of the City and of its residents, and to preserve and improve the peace, safety, health, welfare, comfort, and convenience of its residents, and each and every provision of this Code of Ordinances shall be deemed to be in the exercise of the foregoing powers and the performance of the foregoing functions.

(Code of Iowa, Sec. 364.1)

1.04 INDEMNITY. The applicant for any permit or license under this Code of Ordinances, by making such application, assumes and agrees to pay for any injury to or death of any person or persons whomsoever, and any loss of or damage to property whatsoever, including all costs and expenses incident thereto, however arising from or related to, directly, indirectly, or remotely, the issuance of the permit or license, or the doing of anything thereunder, or the failure of such applicant, or the agents, employees, or servants of such applicant, to abide by or comply with any of the provisions of this Code of Ordinances or the terms and conditions of such permit or license, and such applicant, by making such application, forever agrees to indemnify the City and its officers, agents, and employees, and agrees to save them harmless from any and all claims, demands, lawsuits, or liability whatsoever for any loss, damage, injury, or death, including all costs and expenses incident thereto, by reason of the foregoing. 1.05 PERSONAL INJURIES. When action is brought against the City for personal injuries alleged to have been caused by its negligence, the City may notify in writing any person by whose negligence it claims the injury was caused. The notice shall state the pendency of the action, the name of the plaintiff, the name and location of the court where the action is pending, a brief statement of the alleged facts from which the cause arose, that the

City believes that the person notified is liable to it for any judgment rendered against the City, and asking the person to appear and defend. A judgment obtained in the suit is conclusive in any action by the City against any person so notified, as to the existence of the defect or other cause of the injury or damage, as to the liability of the City to the plaintiff in the first named action, and as to the amount of the damage or injury. The City may maintain an action against the person notified to recover the amount of the judgment together with all the expenses incurred by the City in the suit.

(Code of Iowa, Sec. 364.14)

1.06 RULES OF CONSTRUCTION. In the construction of this Code of Ordinances, the rules of statutory construction as set forth in Chapter 4 of the *Code of Iowa* shall be utilized to ascertain the intent of the Council, with the understanding that the term “statute” as used therein will be deemed to be synonymous with the term “ordinance” when applied to this Code of Ordinances.

1.07 EXTENSION OF AUTHORITY. Whenever an officer or employee is required or authorized to do an act by a provision of this Code of Ordinances, the provision shall be construed as authorizing performance by a regular assistant, subordinate, or a duly authorized designee of said officer or employee.

1.08 AMENDMENTS. All ordinances that amend, repeal, or in any manner affect this Code of Ordinances shall include proper reference to chapter, section, subsection, or paragraph to maintain an orderly codification of ordinances of the City.

1.10 ALTERING CODE. It is unlawful for any unauthorized person to change or amend, by additions or deletions, any part or portion of this Code of Ordinances, or to insert or delete pages, or portions thereof, or to alter or tamper with this Code of Ordinances in any manner that will cause the law of the City to be misrepresented.

1.11 SEVERABILITY. If any section, provision, or part of this Code of Ordinances is adjudged invalid or unconstitutional, such adjudication will not affect the validity of this Code of Ordinances as a whole or any section, provision, or part thereof not adjudged invalid or unconstitutional.

1.12 WARRANTS. If consent to enter upon or inspect any building, structure, or property pursuant to a municipal ordinance is withheld by any person having the lawful right to exclude, the City officer or employee having the duty to enter upon or conduct the inspection may apply to the Iowa District Court in and for the County, pursuant to Section 808.14 of the *Code of Iowa*, for an administrative search warrant. No owner, operator or occupant, or any other person having charge, care, or control of any dwelling unit, rooming unit, structure, building, or premises shall fail or neglect, after presentation of a search warrant, to permit entry therein by the municipal officer or employee.

1.13 GENERAL STANDARDS FOR ACTION. Whenever this Code of Ordinances grants any discretionary power to the Council or any commission, board, or officer or employee of the City and does not specify standards to govern the exercise of the power, the power shall be exercised in light of the following standard: The discretionary power to grant, deny, or revoke any matter shall be considered in light of the facts and circumstances then existing and as may be reasonably foreseeable, and due consideration shall be given to the impact upon the public health, safety and welfare, and the decision shall be that of a reasonably prudent person under similar circumstances in the exercise of the police power.

1.14 STANDARD PENALTY. Unless another penalty is expressly provided by this Code of Ordinances for violation of any particular provision, section, or chapter, any person failing to perform a duty required by this Code of Ordinances or otherwise violating any provision of this Code of Ordinances or any rule or regulation adopted herein by reference shall, upon conviction, be subject to a fine of at least \$65.00 but not to exceed \$625.00. (Code of Iowa, Sec. 364.22[3])

4.02 ENVIRONMENTAL VIOLATION. A municipal infraction that is a violation of Chapter 455B of the *Code of Iowa* or of a standard established by the City in consultation with the Department of Natural Resources, or both, may be classified as an environmental violation. However, the provisions of this section shall not be applicable until the City has offered to participate in informal negotiations regarding the violation or to the following specific violations:

(Code of Iowa, Sec. 364.22[1])

1. A violation arising from noncompliance with a pretreatment standard or requirement referred to in 40 C.F.R. §403.8.
2. The discharge of airborne residue from grain, created by the handling, drying, or storing of grain, by a person not engaged in the industrial production or manufacturing of grain products.
3. The discharge of airborne residue from grain, created by the handling, drying, or storing of grain, by a person engaged in such industrial production or manufacturing if such discharge occurs from September 15 to January 15.

4.03 PENALTIES. A municipal infraction is punishable by the following civil penalties:

(Code of Iowa, Sec. 364.22[1])

1. Standard Civil Penalties.
 - A. First offense – not to exceed \$750.00

Each day that a violation occurs or is permitted to exist constitutes a repeat offense.

2. Special Civil Penalties.
 - A. A municipal infraction arising from noncompliance with a pretreatment standard or requirement, referred to in 40 C.F.R. §403.8, by an industrial user is punishable by a penalty of not more than \$1,000.00 for each day a violation exists or continues.

[†] **EDITOR'S NOTE:** For criminal penalty for violations of this Code of Ordinances, see Section 1.14.

B. A municipal infraction classified as an environmental violation is punishable by a penalty of not more than \$1,000.00 for each occurrence. However, an environmental violation is not subject to such penalty if all of the following conditions are satisfied:

- (1) The violation results solely from conducting an initial startup, cleaning, repairing, performing scheduled maintenance, testing, or conducting a shutdown of either equipment causing the violation or the equipment designed to reduce or eliminate the violation.
- (2) The City is notified of the violation within 24 hours from the time that the violation begins.
- (3) The violation does not continue in existence for more than eight hours.

4.04 CIVIL CITATIONS. Any officer authorized by the City to enforce this Code of Ordinances may issue a civil citation to a person who commits a municipal infraction. A copy of the citation may be served by personal service as provided in Rule of Civil Procedure 1.305, by certified mail addressed to the defendant at defendant's last known mailing address, return receipt requested, or by publication in the manner as provided in Rule of Civil Procedure 1.310 and subject to the conditions of Rule of Civil Procedure 1.311. A copy of the citation shall be retained by the issuing officer, and the original citation shall be sent to the Clerk of the District Court. 6. The time and place of court appearance.
7. The penalty for failure to appear in court.
8. The legal description of the affected real property, if applicable.

If the citation affects real property and charges a violation relating to the condition of the property, including a building code violation, a local housing regulation violation, a housing code violation, or a public health or safety violation, after filing the citation with the Clerk of the District Court, the City shall also file the citation in the office of the County Treasurer.

4.05 ALTERNATIVE RELIEF. Seeking a civil penalty as authorized in this chapter does not preclude the City from seeking alternative relief from the court in the same action. Such alternative relief may include, but is not limited to, an order for abatement or injunctive relief.

(Code of Iowa, Sec. 364.22[8])

4.06 ALTERNATIVE PENALTIES. This chapter does not preclude a peace officer from issuing a criminal citation for a violation of this Code of Ordinances or regulation if criminal penalties are also provided for the violation. Nor does it preclude or limit the authority of the City to enforce the provisions of this Code of Ordinances by criminal sanctions or other lawful means.

8.05 Limitations

8.06 Applications

8.07 Approval

8.08 Exemption Repealed

8.09 Dual Exemptions Prohibited

8.01 PURPOSE. The purpose of this chapter is to provide for a partial exemption from property taxation of the actual value added to industrial real estate by the new construction of industrial real estate, research-service facilities, warehouses, and distribution centers.

8.02 DEFINITIONS. For use in this chapter the following terms are defined:

1. “Actual value added” means the actual value added as of the first year for which the exemption is received.
2. “Distribution center” means a building or structure used primarily for the storage of goods that are intended for subsequent shipment to retail outlets. Distribution center does not mean a building or structure used primarily to store raw agricultural products, used primarily by a manufacturer to store goods to be used in the manufacturing process, used primarily for the storage of petroleum products, or used for the retail sale of goods.
3. “New construction” means new buildings and structures and includes new buildings and structures that are constructed as additions to existing buildings and structures. New construction does not include reconstruction of an existing building or structure that does not constitute complete replacement of an existing building or structure or refitting of an existing building or structure unless the reconstruction of an existing building or structure is required due to economic obsolescence and the reconstruction is necessary to implement recognized industry standards for the manufacturing and processing of specific products and the reconstruction is required for the owner of the building or structure to continue competitively to manufacture or process those products, which determination shall receive prior approval from the City Council.
4. “Research-service facilities” means a building or group of buildings devoted primarily to research and development activities, including (but not limited to) the design and production or manufacture of prototype products for experimental use and corporate research services that do not have a primary purpose of providing on-site services to the public.
5. “Warehouse” means a building or structure used as a public warehouse for the storage of goods pursuant to Chapter 554, Article 7, of the *Code of Iowa*, except that it does not mean a building or structure used primarily to store raw agricultural products or from which goods are sold at retail.

8.03 PERIOD OF PARTIAL EXEMPTION. The actual value added to industrial real estate by the new construction of industrial real estate, research-service facilities, warehouses, and distribution centers is eligible to receive a partial exemption from taxation for a period of

five years. The exemption shall also apply to the acquisition of or improvement to machinery and equipment assessed as real estate pursuant to Section 427A.1[1e] of the *Code of Iowa*, unless the machinery or equipment is part of the normal replacement or operating process to maintain or expand the existing operational status.

(Code of Iowa, Sec. 427B.3)

8.04 AMOUNTS ELIGIBLE FOR EXEMPTION. The amount of actual value added, which is eligible to be exempt from taxation, shall be as follows:

(Code of Iowa, Sec. 427B.3)

1. For the first year, 75 percent.
2. For the second year, 60 percent.
3. For the third year, 45 percent.
4. For the fourth year, 30 percent.
5. For the fifth year, 15 percent.

8.05 LIMITATIONS. The granting of the exemption under this chapter for new construction constituting complete replacement of an existing building or structure shall not result in the assessed value of the industrial real estate being reduced below the assessed value of the industrial real estate before the start of the new construction added.

(Code of Iowa, Sec. 427B.3)

8.06 APPLICATIONS. An application shall be filed for each project resulting in actual value added for which an exemption is claimed.

(Code of Iowa, Sec. 427B.4)

1. The application for exemption shall be filed by the owner of the property with the local assessor by February 1 of the assessment year in which the value added is first assessed for taxation.
2. Applications for exemption shall be made on forms prescribed by the Director of Revenue and shall contain information pertaining to the nature of the improvement, its cost, and other information deemed necessary by the Director of Revenue.

8.07 APPROVAL. A person may submit a proposal to the City Council to receive prior approval for eligibility for a tax exemption on new construction. If the City Council resolves to consider such proposal, it shall publish notice and hold a public hearing thereon. Thereafter, at least 30 days after such hearing, the City Council, by ordinance, may give its prior approval of a tax exemption for new construction if the new construction is in conformance with City zoning. Such prior approval shall not entitle the owner to exemption from taxation until the new construction has been completed and found to be qualified real estate.

(Code of Iowa, Sec. 427B.4)

8.08 EXEMPTION REPEALED. When in the opinion of the City Council continuation of the exemption granted by this chapter ceases to be of benefit to the City, the City Council may repeal this chapter, but all existing exemptions shall continue until their expiration.

(Code of Iowa, Sec. 427B.5)

8.09 DUAL EXEMPTIONS PROHIBITED. A property tax exemption under this chapter shall not be granted if the property for which the exemption is claimed has received any other property tax exemption authorized by law.

HAZARDOUS SUBSTANCE SPILLS

36.01 Purpose
36.02 Definitions
36.03 Cleanup Required
36.04 Liability for Cleanup Costs

36.05 Notifications
36.06 Police Authority
36.07 Liability

36.01 PURPOSE. In order to reduce the danger to the public health, safety, and welfare from the leaks and spills of hazardous substances, these regulations are promulgated to establish responsibility for the treatment, removal and cleanup of hazardous substance spills within the City limits.

36.02 DEFINITIONS. For purposes of this chapter the following terms are defined:

1. “Cleanup” means actions necessary to contain, collect, control, identify, analyze, clean up, treat, disperse, remove, or dispose of a hazardous substance.

(Code of Iowa, Sec. 455B.381[1])

2. “Hazardous condition” means any situation involving the actual, imminent, or probable spillage, leakage, or release of a hazardous substance onto the land, into a water of the State, or into the atmosphere which creates an immediate or potential danger to the public health or safety or to the environment.

(Code of Iowa, Sec. 455B.381[4])

3. “Hazardous substance” means any substance or mixture of substances that presents a danger to the public health or safety and includes, but is not limited to, a substance that is toxic, corrosive, or flammable, or that is an irritant or that generates pressure through decomposition, heat, or other means. “Hazardous substance” may include any hazardous waste identified or listed by the administrator of the United States Environmental Protection Agency under the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, or any toxic pollutant listed under Section 307 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous substance designated under Section 311 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous material designated by the Secretary of Transportation under the Hazardous Materials Transportation Act.

(Code of Iowa, Sec. 455B.381[5])

4. “Responsible person” means a person who at any time produces, handles, stores, uses, transports, refines, or disposes of a hazardous substance, the release of which creates a hazardous condition, including bailees, carriers, and any other person in control of a hazardous substance when a hazardous condition occurs, whether the person owns the hazardous substance or is operating under a lease, contract, or other agreement with the legal owner of the hazardous substance.

(Code of Iowa, Sec. 455B.381[7])

36.03 CLEANUP REQUIRED. Whenever a hazardous condition is created by the deposit, injection, dumping, spilling, leaking or placing of a hazardous substance, so that the hazardous substance or a constituent of the hazardous substance may enter the environment or be emitted

into the air or discharged into any waters, including ground waters, the responsible person shall cause the condition to be remedied by a cleanup, as defined in the preceding section, as rapidly as feasible to an acceptable, safe condition. The costs of cleanup shall be borne by the responsible person. If the responsible person does not cause the cleanup to begin in a reasonable time in relation to the hazard and circumstances of the incident, the City may, by an authorized officer, give reasonable notice, based on the character of the hazardous condition, said notice setting a deadline for accomplishing the cleanup and stating that the City will proceed to procure cleanup services and bill the responsible person for all costs associated with the cleanup if the cleanup is not accomplished within the deadline. In the event that it is determined that immediate cleanup is necessary as a result of the present danger to the public health, safety and welfare, then no notice shall be required and the City may proceed to procure the cleanup and bill the responsible person for all costs associated with the cleanup. If the bill for those services is not paid within 30 days, the City Attorney shall proceed to obtain payment by all legal means. If the cost of the cleanup is beyond the capacity of the City to finance it, the authorized officer shall report to the Council and immediately seek any State or federal funds available for said cleanup.

36.04 LIABILITY FOR CLEANUP COSTS. The responsible person shall be strictly liable to the City for all of the following:

1. The reasonable cleanup costs incurred by the City or the agents of the City as a result of the failure of the responsible person to clean up a hazardous substance involved in a hazardous condition.
2. The reasonable costs incurred by the City or the agents of the City to evacuate people from the area threatened by a hazardous condition caused by the person.
3. The reasonable damages to the City for the injury to, destruction of, or loss of City property, including parks and roads, resulting from a hazardous condition caused by that person, including the costs of assessing the injury, destruction or loss.
4. The excessive and extraordinary cost incurred by the City or the agents of the City in responding at and to the scene of a hazardous condition caused by that person.

36.05 NOTIFICATIONS.

1. A person manufacturing, storing, handling, transporting, or disposing of a hazardous substance shall notify the State Department of Natural Resources and the Police Chief of the occurrence of a hazardous condition as soon as possible but not later than six hours after the onset of the hazardous condition or discovery of the hazardous condition. The Police Chief shall immediately notify the Department of Natural Resources.
2. Any other person who discovers a hazardous condition shall notify the Police Chief, who shall then notify the Department of Natural Resources.

36.06 POLICE AUTHORITY. If the circumstances reasonably so require, the law enforcement officer or an authorized representative may:

1. Evacuate persons from their homes to areas away from the site of a hazardous condition, and
2. Establish perimeters or other boundaries at or near the site of a hazardous condition and limit access to cleanup personnel.

No person shall disobey an order of any law enforcement officer issued under this section.

46.01 CIGARETTES AND TOBACCO. It is unlawful for any person under 18 years of age to smoke, use, possess, purchase, or attempt to purchase any tobacco, tobacco products, alternative nicotine products, vapor products, or cigarettes. Possession of tobacco, tobacco products, alternative nicotine products, vapor products, or cigarettes by a person under 18 years of age shall not constitute a violation of this section if said person possesses the tobacco, tobacco products, alternative nicotine products, vapor products, or cigarettes as part of the person's employment and said person is employed by a person who holds a valid permit under Chapter 453A of the *Code of Iowa* or who lawfully offers for sale or sells cigarettes or tobacco products.

(Code of Iowa, Sec. 453A.2)

46.02 CONTRIBUTING TO DELINQUENCY. It is unlawful for any person to encourage any child under 18 years of age to commit any act of delinquency.

(Code of Iowa, Sec. 709A.1)

46.03 CURFEW. The Council has determined that a curfew for minors is necessary to promote the public health, safety, morals and general welfare of the City and specifically to reinforce the primary authority and responsibility of adults responsible for minors; to protect the public from the illegal acts of minors committed after the curfew hour; and to protect minors from improper influences and criminal activity that prevail in public places after the curfew hour.

1. Definitions. For use in this section, the following terms are defined:
 - A. "Emergency errand" means, but is not limited to, an errand relating to a fire, a natural disaster, an automobile accident or any other situation requiring immediate action to prevent serious illness, bodily injury or loss of life.
 - B. "Knowingly" means knowledge which a responsible adult should reasonably be expected to have concerning the whereabouts of a minor in that responsible adult's custody. It is intended to continue to hold the neglectful or careless adult responsible for a minor to a reasonable standard of adult responsibility through an objective test. It is therefore no defense that an adult responsible for a minor was completely indifferent to the activities or conduct or whereabouts of the minor.
 - C. "Minor" means any unemancipated person under the age of 18 years.
 - D. "Nonsecured custody" means custody in an unlocked multipurpose area, such as a lobby, office or interrogation room which is not designed, set aside or used as a secure detention area, and the person arrested is not physically secured during the period of custody in the area; the person is physically accompanied by a peace officer or a person employed by the

facility where the person arrested is being held; and the use of the area is limited to providing nonsecured custody only while awaiting transfer to an appropriate juvenile facility or to court, for contacting of and release to the person's parents or other responsible adult or for other administrative purposes; but not for longer than six hours without the oral or written order of a judge or magistrate authorizing the detention. A judge shall not extend the period of time in excess of six hours beyond the initial six-hour period.

E. "Public place" includes stores, parking lots, parks, playgrounds, streets, alleys and sidewalks dedicated to public use; and also includes such parts of buildings and other premises whether publicly or privately owned which are used by the general public or to which the general public is invited commercially for a fee or otherwise; or in or on which the general public is permitted without specific invitation; or to which the general public has access. For purposes of this section, a vehicle or other conveyance is considered to be a public place when in the areas defined above.

F. "Responsible adult" means a parent, guardian or other adult specifically authorized by law or authorized by a parent or guardian to have custody or control of a minor.

G. "Unemancipated" means unmarried and/or still under the custody or control of a responsible adult.

2. Curfew Established. A curfew applicable to minors is established and shall be enforced as follows:

A. No minor 15 years of age or under shall remain in or upon any public place in the City between the hours of 10:00 p.m. and 6:00 a.m. of the following day.

B. No minor age 16 to 17 shall remain in or upon any public place in the City between the hours of 11:00 p.m. and 5:00 a.m. of the following day.

3. Exceptions. The following are exceptions to the curfew hours:

A. The minor is accompanied by a responsible adult.

B. The minor is on the sidewalk or property where the minor resides or on either side of the place where the minor resides and the adult responsible for the minor has given permission for the minor to be there.

C. The minor is present at or is traveling between home and one of the following:

(1) Minor's place of employment in a business, trade or occupation in which the minor is permitted by law to be engaged or, if traveling, within one hour after the end or before the beginning of work.

(2) Minor's place of religious activity or, if traveling, within one hour after the end or before the beginning of the religious activity.

(3) Governmental or political activity or, if traveling, within one hour after the end or before the beginning of the activity.

(4) School activity or, if traveling, within one hour after the end or before the beginning of the activity.

- (5) Assembly such as a march, protest, demonstration, sit-in or meeting of an association for the advancement of economic, political, religious or cultural matters, or for any other activity protected by the First Amendment of the U.S. Constitution guarantees of free exercise of religion, freedom of speech, freedom of assembly or, if traveling, within one hour after the end or before the beginning of the activity.
- D. The minor is on an emergency errand for a responsible adult.
- E. The minor is engaged in interstate travel through the City beginning, ending or passing through the City when such travel is by direct route.
4. Responsibility of Adults. It is unlawful for any responsible adult knowingly to permit or to allow a minor to be in any public place in the City within the time period prohibited by this section unless the minor's presence falls within one of the above exceptions.
5. Enforcement Procedures.
- A. Determination of Age. In determining the age of the juvenile and in the absence of convincing evidence such as a birth certificate or driver's license, a peace officer on the street shall, in the first instance, use his or her best judgment in determining age.
- B. Grounds for Arrest; Conditions of Custody. Grounds for arrest are that the person refuses to sign the citation without qualification; persists in violating the ordinance; refuses to provide proper identification or to identify himself or herself; or constitutes an immediate threat to the person's own safety or to the safety of the public. A law enforcement officer who arrests a minor for a curfew violation may keep the minor in custody either in a shelter care facility or in any non-secured setting. The officer shall not place bodily restraints, such as handcuffs, on the minor unless the minor physically resists or threatens physical violence when being taken into custody. A minor shall not be placed in detention following a curfew violation.
- C. Notification of Responsible Adult. After a minor is taken into custody, the law enforcement officer shall notify the adult responsible for the minor as soon as possible. The minor shall be released to the adult responsible for the minor upon the promise of such person to produce the child in court at such time as the court may direct.
- D. Minor Without Adult Supervision. If a peace officer determines that a minor does not have adult supervision because the peace officer cannot locate the minor's parent, guardian or other person legally responsible for the care of the minor, within a reasonable time, the peace officer shall attempt to place the minor with an adult relative of the minor, an adult person who cares for the child or another adult person who is known to the child.
6. Penalties.
- A. Responsible Adult's First Violation. In the case of a first violation by a minor, the peace officer shall, by certified mail, send to the adult responsible for the minor, written notice of the violation with a warning that any subsequent violation will result in full enforcement of the curfew ordinance against both the responsible adult and minor, with applicable penalties.

B. Responsible Adult's Second Violation. Any responsible adult as defined in this section who, following receipt of a warning, knowingly allows the minor to violate any of the provisions of this section is guilty of a simple misdemeanor.

C. Minor's First Violation. In the case of a first violation by a minor, the peace officer shall give the minor a written warning, which states that any subsequent violation will result in full enforcement of the curfew ordinance against the responsible adult and the minor, with applicable penalties.

D. Minor's Second Violation. For the minor's second and subsequent violations of any of the provisions of this section, the minor is guilty of a simple misdemeanor.

E. Sentence and Fine for Misdemeanants. A person convicted of a simple misdemeanor under Section 46.03 shall be required to pay a fine of \$100 plus court cost and may be required to perform community service as ordered by the court.

10. “Recreational vehicle” means any motor-powered vehicle designed to carry at least one passenger or driver and equipped for use in racing or other recreational

events or uses off of public right-of-way on public or private property; except, however, for the purposes of this chapter, any such vehicle which is licensed for use on the public highways is deemed a “motor vehicle” (or “motorcycle” if two or three-wheeled) and not a “recreational vehicle.” (Examples of recreational vehicles are a snowmobile, a minibike, a stock car or motorboat.

11. “Residential property” means any property on which is located a building or structure used wholly or partially for living or sleeping purposes.

For the purposes of this section the sound made by a vehicle's original exhaust system may be determined by the observation of the sound made by the original exhaust system of another similar vehicle.
8. Revving of Engine. A car/vehicle with a good exhaust system that is causing a disturbance by revving its engine while on private or public property.
9. Animal or Bird Noises. The frequent or habitual sound made by a domesticated animal or bird, other than livestock owned or possessed for agricultural purposes, which is received between the hours of 9:00 p.m. and 7:00 a.m. at the real property boundary of residential property.

Whenever any authorized municipal officer finds that a nuisance exists, such officer has the authority to determine on a case-by-case basis whether to utilize the nuisance abatement procedure described in Section 50.06 of this chapter or the municipal infraction procedure referred to in Section 50.07.

(Code of Iowa, Sec. 364.12[3h])

3. Request for Hearing. Any person ordered to abate a nuisance may have a hearing with the Council as to whether a nuisance exists. A request for a hearing must be made in writing and delivered to the Clerk within the time stated in the notice, or it will be conclusively presumed that a nuisance exists and it must be abated as ordered. The hearing will be before the Council at a time and place fixed by the Council. The findings of the Council shall be conclusive and, if a nuisance is found to exist, it shall be ordered abated within a reasonable time under the circumstances.
4. Abatement in Emergency. If it is determined that an emergency exists by reason of the continuing maintenance of the nuisance or condition, the City may perform any action that may be required under this chapter without prior notice. [†] **EDITOR'S NOTE:** A suggested form of notice for the abatement of nuisances is included in the Appendix of this Code of Ordinances. Caution is urged in the use of this administrative abatement procedure, particularly where cost of abatement is more than minimal or where there is doubt as to whether or not a nuisance does in fact exist. If compliance is not secured following notice and hearings, we recommend you review the situation with your attorney before proceeding with abatement and assessment of costs. Your attorney may recommend proceedings in court under Chapter 657 of the *Code of Iowa* rather than this procedure.

5. Abatement by City. If the person notified to abate a nuisance or condition neglects or fails to abate as directed, the City may perform the required action to abate, keeping an accurate account of the expense incurred. The itemized expense account shall be filed with the Clerk, who shall pay such expenses on behalf of the City.

(Code of Iowa, Sec. 364.12[3h])

6. Collection of Costs. The Clerk shall send a statement of the total expense incurred by certified mail to the property owner who has failed to abide by the notice to abate, and if the amount shown by the statement has not been paid within one month, the Clerk shall certify the costs to the County Treasurer and such costs shall then be collected with, and in the same manner as, general property taxes.

(Code of Iowa, Sec. 364.12[3h])

7. Installment Payment of Cost of Abatement. If the amount expended to abate the nuisance or condition exceeds \$500.00, the City may permit the assessment to be paid in up to 10 annual installments, to be paid in the same manner and with the same interest rates provided for assessments against benefited property under State law.

(Code of Iowa, Sec. 364.13)

8. Failure to Abate. Any person causing or maintaining a nuisance who shall fail or refuse to abate or remove the same within the reasonable time required and specified in the notice to abate is in violation of this Code of Ordinances.

The City shall be under no duty to attempt the confinement or capture of a dangerous animal found at large, nor shall it have a duty to notify the owner of such animal prior to its destruction.

2. Upon the complaint of any individual that a person is keeping, sheltering or harboring a dangerous animal on premises in the City, a peace officer shall cause the matter to be investigated and if after investigation, the facts indicate that the person named in the complaint is keeping, sheltering or harboring a dangerous animal in the City, the peace officer shall order the person named in the complaint to safely remove such animal from the City. Such order shall be contained in a notice to remove the dangerous animal, which notice shall be given in writing to the person keeping, sheltering or harboring the dangerous animal, and shall be served personally or by certified mail. Such order and notice to remove the dangerous animal shall not be required where such dangerous animal has previously caused serious physical harm or death to any person, in which case the peace officer shall cause the animal to be immediately seized and impounded or killed if seizure and impoundment are not possible without risk of serious physical harm or death to any person.

3. The order to remove a dangerous animal issued by the peace officer may be appealed to the Council. In order to appeal such order, written notice of appeal must be filed with the Clerk within three days after receipt of the order contained in the notice to remove the dangerous animal. Failure to file such written notice of appeal shall constitute a waiver of right to appeal the order of the Police Chief.

4. The notice of appeal shall state the grounds for such appeal and shall be delivered personally or by certified mail to the Clerk. The hearing of such appeal shall be scheduled within seven days of the receipt of notice of appeal. The hearing may be continued for good cause, as determined by the Council. The decision and order shall immediately be served upon the person against whom rendered in the same manner as the notice of removal. If the original order of the Police Chief is not appealed and is not complied with within three days, or the order of the Council after appeal is not complied with within three days, of its issuance, the Police Chief is authorized to seize and impound such dangerous animal. An animal so seized shall be impounded for a period of seven days. If at the end of the impoundment period, the person against whom the decision and order of the Police Chief or Council was issued has not petitioned the Butler County District Court for a review of said order, a peace officer shall cause the animal to be disposed of by sale, permanently place such animal with an organization or group allowed to possess dangerous animals or destroy such animal in a humane manner. If, after hearing, the Mayor determines that an animal is vicious, the Mayor shall order the person owning, sheltering or harboring or keeping the animal to cause it to be destroyed in a humane manner. The order shall immediately be served upon the person against whom issued in the same manner as the notice of hearing. If the order is not complied with within three days of its issuance, the Mayor is authorized to seize and impound the animal. An animal so seized shall be impounded for a period of seven days. If at the end of the impoundment period, the person against whom the order of the Mayor was issued has not appealed such order to the Council, the Mayor shall cause the animal to be destroyed in a humane manner.

3. The order to destroy a vicious animal issued by the Mayor may be appealed to the Council. In order to appeal such order, written notice of appeal must be filed with the Clerk within three days after receipt of the order to destroy the vicious animal.

Failure to file such written notice of appeal shall constitute a waiver of right to appeal the order of the Mayor.

4. The notice of appeal shall state the grounds for such appeal and shall be delivered personally or by certified mail to the Clerk. The hearing of such appeal shall be scheduled within seven days of the receipt of notice of appeal. The hearing may be continued for good cause as determined by the Council. After such hearing, the Council may affirm or reverse the order of the Mayor. Such determination shall be contained in a written decision and shall be filed with the Clerk within three days after the hearing or any continued session thereof.

5. If the Council affirms the action of the Mayor, the Council shall order in its written decision that the person owning, sheltering, harboring or keeping such vicious animal cause it to be destroyed in a humane manner. An animal so seized shall be impounded for a period of seven days. If at the end of the impoundment period, the person against whom the decision and order of the Mayor and/or the Council was issued has not petitioned the Butler County District Court for a review of said order, the Mayor shall cause the animal to be destroyed in a humane manner.

6. Failure to comply with an order of the Mayor issued pursuant hereto and not appealed, or of the Council after appeal, is a simple misdemeanor.

7. Any animal found at large which displays vicious tendencies may be processed as a vicious animal pursuant to the foregoing, unless the animal is so vicious that it cannot be safely be apprehended, in which case a peace officer may immediately destroy it.

8. An operator of an off-road utility vehicle is also subject to the provisions of this chapter governing the operation of all-terrain vehicles.

4. “Operate” means to ride in or on, other than as a passenger, use or control the operation of ATV in any manner, whether or not the ATV is moving.
5. “Operator” means a person who operates or is in actual physical control of a golf cart or UTV.
6. “Roadway” means that portion of a highway improved, designated or ordinarily used for vehicular travel.

75.07 NEGLIGENCE. The owner and operator of an ATV or snowmobile are liable for any injury or damage occasioned by the negligent operation of the ATV or snowmobile. The owner of an ATV or snowmobile shall be liable for any such injury or damage only if the owner was the operator of the ATV or snowmobile at the time the injury or damage occurred or if the operator had the owner's consent to operate the ATV or snowmobile at the time the injury or damage occurred.

The published notice may contain multiple listings of abandoned vehicles but shall be published within the same time requirements and contain the same information as prescribed for mailed notice in Subsection 2 of this section.

95.05 SEWER CONNECTION REQUIRED. The owners of any houses, buildings, or properties used for human occupancy, employment, recreation or other purposes, situated within the City and abutting on any street, alley or right-of-way in which there is now located, or may in the future be located, a public sanitary or combined sewer, are hereby required to install, at such owner's expense, suitable toilet facilities therein and a building sewer connecting such facilities directly with the proper public sewer, and to maintain the same all in accordance with the provisions of these Sanitary Sewer chapters, such compliance to be completed within 60 days after date of official notice from the City to do so provided that said public sewer is located within 200 feet of the property line of such owner and is of such design as to receive and convey by gravity such sewage as may be conveyed to it. Billing for sanitary sewer service will begin the date of official notice to connect to the public sewer.

(Code of Iowa, Sec. 364.12[3f])

(IAC, 567-69.1[3])

95.06 SERVICE OUTSIDE THE CITY. The owners of property outside the corporate limits of the City so situated that it may be served by the City sewer system may apply to the Council for permission to connect to the public sewer upon the terms and conditions stipulated by resolution of the Council.

96.01 Permission Required
96.02 Connection Charge
96.03 Plumber Required
96.04 Excavations
96.05 Connection Requirements
96.06 Backwater Valves

96.07 Interceptors Required
96.08 Sewer Tap

96.01 PERMISSION REQUIRED. No unauthorized person shall uncover, make any connection with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining permission from the City. The person seeking permission shall provide the location and description of the property to be connected with the sewer system and the purpose for which the sewer is to be used, and any plans, specifications, or other information considered pertinent. The construction and connection of the building sewer shall be completed within 60 days, except that when a property owner makes sufficient showing that due to conditions beyond the owner's control or peculiar hardship, such time period is inequitable or unfair, an extension of time within which to comply with the provisions herein may be granted.

96.02 CONNECTION CHARGE. A connection charge in the amount of \$100.00 shall be paid to reimburse the City for costs borne by the City in making sewer service available to the property served.

96.03 PLUMBER REQUIRED. All installations of building sewers and connections to the public sewer shall be made by a State-licensed plumber.

96.04 EXCAVATIONS. All trench work, excavation, and backfilling required for the installation of a building sewer shall be performed in accordance with the provisions of the *State Plumbing Code* and the provisions of Chapter 135 of this Code of Ordinances.

96.05 CONNECTION REQUIREMENTS. Any connection with a public sanitary sewer must be made under the direct supervision of the Superintendent and in accordance with the following:

1. **Old Building Sewers.** Old building sewers may be used in connection with new buildings only when they are found, on examination and test conducted by the owner and observed by the Superintendent, to meet all requirements of this chapter.
2. **Separate Building Sewers.** A separate and independent building sewer shall be provided for every occupied building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway. In such cases the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.
3. **Installation.** The installation and connection of the building sewer to the public sewer shall conform to the requirements of the *State Plumbing Code* and applicable rules and regulations of the City. All such connections shall be made

gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

4. Water Lines. When possible, building sewers should be laid at least 10 feet horizontally from a water service. The horizontal separation may be less, provided the water service line is located at one side and at least 12 inches above the top of the building sewer.

5. Size. Building sewers shall be sized for the peak expected sewage flow from the building with a minimum building sewer size of four inches.

6. Alignment and Grade. All building sewers shall be laid to a straight line to meet the following:

- A. Recommended grade at one-fourth inch per foot.
- B. Minimum grade of one-eighth inch per foot.
- C. Minimum velocity of two feet per second with the sewer half full.
- D. Any deviation in alignment or grade shall be made only with the written approval of the Superintendent and shall be made only with approved fittings.

7. Depth. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth of cover above the sewer shall be sufficient to afford protection from frost.

8. Sewage Lifts. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such drain shall be lifted by approved artificial means and discharged to the building sewer.

9. Pipe Specifications. Building sewer pipe shall be free from flaws, splits, or breaks. Materials shall be as specified in the *State Plumbing Code* except that the building sewer pipe, from the property line to the public sewer, shall comply with the current edition of one of the following:

- A. Clay sewer pipe – A.S.T.M. C-700 (extra strength).
- B. Extra heavy cast iron soil pipe – A.S.T.M. A-74.
- C. Ductile iron water pipe – A.W.W.A. C-151.
- D. P.V.C. – SDR26 – A.S.T.M. D-3034.

10. Bearing Walls. No building sewer shall be laid parallel to or within three feet of any bearing wall that might thereby be weakened.

11. Jointing. Fittings, type of joint and jointing material shall be compatible with the type of pipe used, subject to the approval of the Superintendent. Solvent-welded joints are not permitted.

12. Unstable Soil. No sewer connection shall be laid so that it is exposed when crossing any watercourse. Where an old watercourse must of necessity be crossed or where there is any danger of undermining or settlement, cast iron soil pipe or vitrified clay sewer pipe thoroughly encased in concrete shall be required for such crossings. Such encasement shall extend at least six inches on all sides of the pipe. The cast iron pipe or encased clay pipe shall rest on firm, solid material at either end.

13. Preparation of Basement or Crawl Space. No connection for any residence, business or other structure with any sanitary sewer shall be made unless the basement floor is poured, or in the case of a building with a slab or crawl space, unless the ground floor is installed with the area adjacent to the foundation of such building cleared of debris and backfilled. The backfill shall be well compacted and graded so that the drainage is away from the foundation. Prior to the time the basement floor is poured, or the first floor is installed in buildings without basements, the sewer shall be plugged and the plug shall be sealed by the Superintendent. Any accumulation of water in any excavation or basement during construction and prior to connection to the sanitary sewer shall be removed by means other than draining into the sanitary sewer.

96.06 BACKWATER VALVES. A backwater valve shall be installed on all new sanitary sewer services in residential, commercial and industrial sewer installations. The valve shall be installed immediately inside the footings. The valve is designed to be installed horizontally in the building drainage system and shall be installed with the access opening at the top to permit access to the valve for periodic inspections.

96.07 INTERCEPTORS REQUIRED. Grease, oil, sludge and sand interceptors shall be provided by gas and service stations, convenience stores, car washes, garages, and other facilities when, in the opinion of the Superintendent, they are necessary for the proper handling of such wastes that contain grease in excessive amounts or any flammable waste, sand or other harmful ingredients. Such interceptors shall not be required for private living quarters or dwelling units. When required, such interceptors shall be installed in accordance with the following:

1. Design and Location. All interceptors shall be of a type and capacity as specified in the *State Plumbing Code*, to be approved by the Superintendent, and shall be located so as to be readily and easily accessible for cleaning and inspection.
2. Construction Standards. The interceptors shall be constructed of impervious material capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight and equipped with easily removable covers that shall be gastight and watertight.
3. Maintenance. All such interceptors shall be maintained by the owner at the owner's expense and shall be kept in continuously efficient operations at all times.

96.08 SEWER TAP. Connection of the building sewer into the public sewer shall be made at the "Y" branch, if such branch is available at a suitable location. If no properly located "Y" branch is available, a saddle "Y" shall be installed at the location specified by the Superintendent. The public sewer shall be tapped with a tapping machine and a saddle appropriate to the type of public sewer shall be glued or attached with a gasket and stainless steel clamps to the sewer. At no time shall a building sewer be constructed so as to enter a manhole unless special written permission is received from the Superintendent and in accordance with the Superintendent's direction if such connection is approved.

96.09 INSPECTION REQUIRED. All connections with the sanitary sewer system before being covered shall be inspected and approved, in writing, by the Superintendent. As soon as all pipe work from the public sewer to inside the building has been completed, and before any backfilling is done, the Superintendent shall be notified and the Superintendent shall inspect and test the work as to workmanship and material; no sewer pipe laid underground shall be covered or trenches filled until after the sewer has been so inspected and approved. If the

Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work.

96.10 PROPERTY OWNER'S RESPONSIBILITY. All costs and expenses incident to the installation, connection, and maintenance of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

96.11 ABATEMENT OF VIOLATIONS. Construction or maintenance of building sewer lines, whether located upon the private property of any owner or in the public right-of-way, which construction or maintenance is in violation of any of the requirements of this chapter, shall be corrected, at the owner's expense, within 30 days after date of official notice from the Council of such violation. If not made within such time, the Council shall, in addition to the other penalties herein provided, have the right to finish and correct the work and assess the cost thereof to the property owner. Such assessment shall be collected with and in the same manner as general property taxes.

(Code of Iowa, Sec. 364.12[3])

CHAPTER 97

USE OF PUBLIC SEWERS

97.01 Storm Water
97.02 Surface Waters Exception
97.03 Prohibited Discharges
97.04 Restricted Discharges

97.05 Restricted Discharges; Powers of Superintendent
97.06 Special Facilities
97.07 Control Manholes
97.08 Testing of Wastes

97.01 STORM WATER. No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof run-off, sub-surface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Storm water and all other unpolluted drainage shall be discharged to such sewers that are specifically designated as combined sewers or storm sewers or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

97.02 SURFACE WATERS EXCEPTION. Special permits for discharging surface waters to a public sanitary sewer may be issued by the Council upon recommendation of the Superintendent where such discharge is deemed necessary or advisable for purposes of flushing, but any permit so issued shall be subject to revocation at any time when deemed to be the best interests of the sewer system.

97.03 PROHIBITED DISCHARGES. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

1. Flammable or Explosive Material. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
2. Toxic or Poisonous Materials. Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two milligrams per liter as CN in the wastes as discharged to the public sewer.
3. Corrosive Wastes. Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.
4. Solid or Viscous Substances. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

than 350 parts per million by weight of suspended solids; or (iii) having an average daily flow greater than two percent of the average sewage flow of the City, shall be subject to the review of the Superintendent.

B. Where necessary in the opinion of the Superintendent, the owner shall provide, at the owner's expense, such preliminary treatment as may be necessary to: (i) reduce the biochemical oxygen demand to 300 parts per million by weight; or (ii) reduce the suspended solids to 350 parts per million by weight; or (iii) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

97.04 RESTRICTED DISCHARGES. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances restricted are:

1. High Temperature. Any liquid or vapor having a temperature higher than 150 degrees F (65 degrees C).
2. Fat, Oil, Grease. Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of 100 milligrams per liter or 600 milligrams per liter of dispersed or other soluble matter.
3. Viscous Substances. Water or wastes containing substances that may solidify or become viscous at temperatures between 32 degrees F and 150 degrees F (0 degrees to 65 degrees C).
4. Garbage. Any garbage that has not been properly shredded, that is, to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half inch in any dimension.
5. Acids. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solution whether neutralized or not.
6. Toxic or Objectionable Wastes. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.
7. Odor or Taste. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits that may be established by the Superintendent as necessary, after treatment of the composite sewage, to meet the requirements of State, federal, or other public agencies of jurisdiction for such discharge to the receiving waters.

8. Radioactive Wastes. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or federal regulations.
9. Excess Alkalinity. Any waters or wastes having a pH in excess of 9.5.
10. Unusual Wastes. Materials that exert or cause:
 - A. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).
 - B. Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).
 - C. Unusual B.O.D., chemical oxygen demand or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.
 - D. Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.
11. Noxious or Malodorous Gases. Any noxious or malodorous gas or other substance that, either singly or by interaction with other wastes, is capable of creating a public nuisance or hazard to life or of preventing entry into sewers for their maintenance and repair.
12. Damaging Substances. Any waters, wastes, materials, or substances that react with water or wastes in the sewer system to release noxious gases, develop color of undesirable intensity, form suspended solids in objectionable concentration or create any other condition deleterious to structures and treatment processes.
13. Untreatable Wastes. Waters or wastes containing substances that are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

97.05 RESTRICTED DISCHARGES; POWERS OF SUPERINTENDENT. If any waters or wastes are discharged or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 97.04 and which in the judgment of the Superintendent may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

1. Rejection. Reject the wastes by requiring disconnection from the public sewage system;
2. Pretreatment. Require pretreatment to an acceptable condition for discharge to the public sewers;
3. Controls Imposed. Require control over the quantities and rates of discharge; and/or
4. Special Charges. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Chapter 99.

97.06 SPECIAL FACILITIES. If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent and subject to the requirements of all applicable codes, ordinances, and laws. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

97.07 CONTROL MANHOLES. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

97.08 TESTING OF WASTES. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this chapter shall be determined in accordance with the latest edition of *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a 24-hour composite of all outfalls of a premises is appropriate or whether a grab sample or samples should be taken. Normally, but not always, B.O.D. and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples).

5. During the appeal period, the franchise shall remain in full force and effect unless the term thereof sooner expires. The court hearing the appeal may impose reasonable conditions on both parties during said period.

As a comparison or test of reasonableness, both parties may compare the provisions of the franchise with other similarly situated franchises of similar size or location.

If disapproved, the disapproval shall include a detailed written finding on which the decision was based.
5. In no event will any transfer take place unless the entity becomes a signatory to the franchise.
6. The foregoing provisions are not intended to restrict Grantee from encumbering its assets in order to secure indebtedness.

112.36 MAPS. Grantee will, at all times, make available any maps or amendments thereto of its system to the City. Such maps will be provided free of charge.

112.37 INDEMNIFICATION. Grantee shall save and hold harmless, indemnify, and defend the City, its officers, agents, and employees from any claims, demands, costs or liabilities of any nature arising out of the construction, maintenance or operation of the cable system, including reasonable attorney fees. officer shall give to the owner of such building or structure written notice stating the defects thereof. This notice may require the owner or person in charge of the building or premises, within 48 hours or such reasonable time as the circumstances require, to commence either the required repairs or improvements or demolition and removal of the building or structure or portions thereof, and all such work shall be completed within 90 days from date of notice, unless otherwise stipulated by the enforcement officer. If necessary, such notice shall also require the building, structure, or portion thereof to be vacated forthwith and not reoccupied until the required repairs and improvements are completed, inspected, and approved by the enforcement officer.

In case the owner fails, neglects, or refuses to comply with the notice to repair, rehabilitate, or to demolish and remove the building or structure or portion thereof, the Council may order the owner of the building prosecuted as a violator of the provisions of this chapter and may order the enforcement officer to proceed with the work specified in such notice. A statement of the cost of such work shall be transmitted to the Council. As an alternative to this action, the City may utilize the municipal infraction process to abate the nuisance.

[†] **EDITOR'S NOTE:** Suggested forms of notice and of a resolution and order of the Council for the administration of this chapter are provided in the APPENDIX to this Code of Ordinances. Caution is urged in the use of this procedure. We recommend you review the situation with your attorney before initiating procedures and follow his or her recommendation carefully.

R-1 - Restricted Residence District

N-R - Nonresidential District

For the purpose of this chapter, all restrictions described herein are applicable in the R-1 Restricted Residence District. All district boundary lines shown on the official map correspond with property lines or street lines or center lines of right-of-way. In the case of a district boundary line which divides a property of single ownership, the City Council may make such boundary line adjustments as to place said lot of single ownership in or out of the Restricted Residence District. All land that is hereafter annexed to the City of Clarksville shall be automatically classified as being in an R-1 Restricted Residence District until such classification is changed by amendment of this chapter, as provided herein.

155.04 GENERAL PROVISIONS.

1. Building Permit and Certificate of Occupancy Required in All Districts.
 - A. No building footprint, area, or size shall hereafter be altered or improved unless a building permit, provided by the City Clerk, approved by the City Code Enforcement Officer, has been approved for each erection, reconstruction, or alteration. Said permit shall be applied for in writing on a properly completed application form, provided by the City Clerk, that is accompanied by plans and specifications sufficient to determine compliance with the applicable ordinances of the City. Any concrete or cement improvements, regardless of the valuation of the project, shall be subject to the permit process defined in this subsection.
 - B. A building permit shall not be issued for buildings that do not comply with this or any other ordinance of the City of Clarksville. The Building Official may revoke a permit or approval, issued under the provisions of this chapter, if a false statement or misrepresentation was made by the applicant on the application or plans on which permit approval was based. Applicant grants to the City Building Official the right to enter onto applicant's property to inspect the improvement or alteration to determine its compliance with the City Code. The City Building Official shall give applicant prior notice before entering onto the property. In the event applicant refuses to allow an inspection of the property, the Building Official may revoke a permit.
 - C. Every permit issued shall become invalid unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced. The Building Official is authorized to grant, in writing, one or more extensions of time for periods not more than 180 days each. The extension shall be requested in writing and justifiable cause demonstrated and accompanied by a permit fee equal to one-half of the original fee.
 - D. The City of Clarksville shall charge a fee for said building permit set by resolution. This does not include the cost of a flood plain permit, which is an additional and entirely separate permit and fee requirement. (See Chapter 160 of this Code of Ordinances.)

- E. No change in the use or occupancy of land, nor any change in use or occupancy in an existing building shall be made, nor shall any new building be occupied for any purpose or use until a certificate of occupancy has been issued by the Building Official. If the new occupancy complies with the provisions of this, and all other Ordinances of the City of Clarksville, the Building Official shall issue said certificate. A certificate of occupancy shall not be issued for uses that do not comply with this or any other Ordinances of the City of Clarksville. There shall be no fee for a certificate of occupancy.
2. Nonconforming Uses and Lots in the Restricted Residence District.
- A. A lawful, or authorized, nonconforming use existing at the time of adoption of this chapter may be continued, maintained, repaired, or sold to another party. Said nonconforming use may not be enlarged, expanded or changed, nor shall it occupy more lot area than was in use on the effective date of the ordinance codified by this chapter unless the Official Restricted Residence Ordinance Map is amended or a special permit is granted.
- B. If said lawful nonconforming use, or any portion thereof, is discontinued, either voluntarily by the owner or through the sale of the property or business, for a period of one year or more, any future use of such land shall be in conformity with the provisions of the R-1 Restricted Residence District unless the Official Restricted Residence Ordinance Map is amended or a special permit is granted.
- C. In any Restricted Residence District on a lot of record at the time of enactment of this chapter, a single-family dwelling may be established regardless of the size or dimension of the lot, provided all other requirements of this chapter are met. However, where two or more vacant and contiguous substandard recorded lots are held in common ownership, they shall be combined into zoning lots and shall thereafter be maintained in common ownership and shall be so joined and developed for implementing this chapter. The razing of a building on a substandard lot shall constitute the formation of a vacant lot.

The front yard limitation shall be 22 feet when there are no adjacent buildings or if there are, shall be the average setback for adjacent buildings.

2. Natural Fencing. The foregoing restrictions shall not apply to any fences comprised solely of any living plants being used as a living fence, excepting that no part of such living fence shall be planted to hang over the property line or obstruct a view of traffic. Furthermore, the frontage height descriptions of four feet shall also apply to such living fences.

155.09 SPECIAL PERMITS IN THE RESTRICTED RESIDENCE DISTRICT. The applicant shall be responsible to provide a list of the names and addresses of the property owners, who are to receive said courtesy notice, together with addressed envelopes with pre-paid first class postage thereon to the Building Official who shall then mail the notices to the property owners. After a public hearing is conducted, but prior to consideration of a special permit, the City Council shall weigh the application using the following special permit standards. The City Council shall find that:

1. The establishment, maintenance, or operation of the special permit will not be detrimental to, or endanger, the public health, safety, or general welfare of the City.
2. The special permit will not be injurious to the use and enjoyment of other property already permitted, nor substantially diminish or impair property values of the neighborhood.
3. The establishment of special permits will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the district.

After a public hearing is conducted and consideration has been given to the above standards, the City Council shall act on the special permit application. The Council may either approve, deny, or table a special permit application by simple majority roll call vote unless 60 percent of the surrounding property owners who received notice object to the special permit application in which case the City Council shall be bound by different voting requirements in that granting a special permit shall then require an affirmative three-fourths vote of all the members of the City Council. Each special permit application shall be accompanied by a check payable to the City or a cash payment in the amount of \$25.00 to cover processing costs.

155.10 PARKING REQUIREMENTS. There shall be a minimum of two off-street parking spaces per dwelling unit required in the Restricted Residence District. This provision shall also apply to all mobile homes, as herein defined.

Notice of the public hearing pertaining to amendments, changes, or alterations of this chapter shall be made in accordance with the special permit procedures for conducting such hearings, as defined herein. Upon adoption, publication, and recordation by the City Council, such amendments, changes, or alterations shall become effective.

155.12 VIOLATION AND PENALTIES. Any building or structure erected, altered, repaired or used in violation of this chapter passed by the City Council shall be deemed a nuisance, and the City Council may provide for the abatement of such nuisance through the procedures outlined in Chapter 50 of this Code of Ordinances.

155.13 VALIDITY. Should any section, provision, or part of this chapter be declared by a court of competent jurisdiction to be invalid, or unconstitutional, that decision shall not affect the validity of the chapter as a whole or any section, provision, or part thereof, not adjudged invalid or unconstitutional.

19. Floodway – The channel of a river or stream and those portions of the floodplains adjoining the channel, which are reasonably required to carry and discharge flood waters or flood flows so that confinement of flood flows to the

floodway area will not cumulatively increase the water surface elevation of the base flood by more than one (1) foot.

20. Floodway fringe – Those portions of the Special Flood Hazard Area outside the floodway.

21. Highest adjacent grade – The highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

31. Start of construction – Includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as dwelling units or not part of the main structure. Substantial damage also means flood-related damages sustained by a structure on two separate occasions during a 10-year period for which the cost of

repairs at the time of such flood event, on the average, equals or exceeds 25 percent of the market value of the structure before the damage occurred. Volunteer labor and donated materials shall be included in the estimated cost of repair.

34. Substantial improvement – Any improvement to a structure which satisfies either of the following criteria:

A. Any repair, reconstruction or improvement of a structure taking place during a 10-year period, the cumulative cost of which, equals or exceeds fifty (50) percent of the market value of the structure either (i) before the “start of construction” of the first improvement of the structure, or (ii) if the structure has been “substantially damaged” and is being restored, before the damage occurred.

B. The term does not, however, include any project for improvement of a structure to correct existing violations of State or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions.

C. B. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed after the effective date of the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.

35. Variance – A grant of relief by a community from the terms of the floodplain management regulations.

36. Violation – The failure of a structure or other development to be fully compliant with the community’s floodplain management regulations.

160.02 STATUTORY AUTHORITY, FINDINGS OF FACT AND PURPOSE.

1. The Legislature of the State of Iowa has in Chapter 364, *Code of Iowa*, as amended, delegated the power to cities to exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges and property of the City or of its residents, and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents.

2. Findings of Fact.

A. The flood hazard areas of the City of Clarksville are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.

B. These flood losses, hazards, and related adverse effects are caused by: (i) the occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.

- C. This ordinance relies upon engineering methodology for analyzing flood hazards which is consistent with the standards established by the Department of Natural Resources.
3. Statement of Purpose. It is the purpose of this ordinance to protect and preserve the rights, privileges and property of the City of Clarksville and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in 160.02(2)(A) of this ordinance with provisions designed to:
- A. Reserve sufficient floodplain area for the conveyance of flood flows so that flood heights and velocities will not be increased substantially.
 - B. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
 - C. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
 - D. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
 - E. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

160.03 GENERAL PROVISIONS.

1. Lands to Which Ordinance Apply. The provisions of this ordinance shall apply to all lands and development which have significant flood hazards. The Flood Insurance Rate Map (FIRM) for Butler County and Incorporated Areas, City of Clarksville, Panel 19023C0216E and 218E, dated December 17, 2020, which were prepared as part of the Butler County Flood Insurance Study, shall be used to identify such hazard areas and all areas shown thereon to be within the boundaries of the base flood shall be considered as having significant flood hazards. The Flood Insurance Study for the County of Butler County is hereby adopted by reference and is made a part of this ordinance for the purpose of administering floodplain management regulations.
2. Rules for Interpretation of Flood Hazard Boundaries. The boundaries of the Special Flood Hazard areas shall be determined by scaling distances on the official Flood Insurance Rate Map. Where uncertainty exists with respect to the precise location of the base flood boundary, the location shall be determined on the basis of the base flood elevation at the particular site in question. When an interpretation is needed as to the exact location of a boundary, the City Clerk shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the City Clerk in the enforcement or administration of this ordinance.
3. Compliance. No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this ordinance and other applicable regulations which apply to uses within the jurisdiction of this ordinance.

4. Abrogation and Greater Restrictions. It is not intended by this ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this ordinance imposes greater restrictions, the provision of this ordinance shall prevail. All other ordinances inconsistent with this ordinance are hereby repealed to the extent of the inconsistency only.
5. Interpretation. In their interpretation and application, the provisions of this ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.
6. Warning and Disclaimer of Liability. The standards required by this ordinance are considered reasonable for regulatory purposes. This ordinance does not imply that areas outside the designated areas of significant flood hazard will be free from flooding or flood damages. This ordinance shall not create liability on the part of the City of Clarksville or any officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made there under.
7. Severability. If any section, clause, provision or portion of this ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this ordinance shall not be affected thereby.

160.04 ADMINISTRATION.

1. Appointment, Duties and Responsibilities of Local Official.
 - A. The City Clerk is hereby appointed to implement and administer the provisions of this ordinance and will herein be referred to as the Administrator.
 - B. Duties and responsibilities of the Administrator shall include, but not necessarily be limited to the following:
 - (1) Review all floodplain development permit applications to assure that the provisions of this ordinance will be satisfied.
 - (2) Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.
 - (3) Record and maintain a record of (i) the elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved buildings or (ii) the elevation to which new or substantially improved structures have been floodproofed.
 - (4) Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications to the Federal Emergency Management Agency.
 - (5) Keep a record of all permits, appeals and such other transactions and correspondence pertaining to the administration of this ordinance.

(6) Submit to the Federal Insurance Administrator an annual report concerning the community's participation, utilizing the annual report form supplied by the Federal Insurance Administrator.

(7) Notify the Federal Insurance Administration of any annexations or modifications to the community's boundaries.

(8) Review subdivision proposals to insure such proposals are consistent with the purpose of this ordinance and advise the City Council of potential conflict.

(9) Maintain the accuracy of the community's Flood Insurance Rate Maps when;

a. Development placed within the floodway results in any of the following:

(i) An increase in the Base Flood Elevations, or

(ii) Alteration to the floodway boundary

b. Development placed in Zones A, AE, AH, and A1-30 that does not include a designated floodway that will cause a rise of more than one foot in the base elevation; or

c. Development relocates or alters the channel.

Within 6 months of the completion of the development, the applicant shall submit to FEMA all scientific and technical data necessary for a Letter of Map Revision.

(10) Perform site inspections to ensure compliance with the standards of this ordinance.

(11) Forward all requests for variances to the City Council for consideration. Ensure all requests include the information ordinarily submitted with applications as well as any additional information deemed necessary to the City Council.

2. Floodplain Development Permit.

A. Permit Required. A floodplain development permit issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving, excavation, storage of materials and equipment, or drilling operations), including the placement of factory-built homes.

B. Application for Permit. Application shall be made on forms furnished by the Administrator and shall include the following:

(1) Description of the work to be covered by the permit for which application is to be made.

(2) Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.

(3) Location and dimensions of all structures and additions.

- (4) Indication of the use or occupancy for which the proposed work is intended.
- (5) Elevation of the base flood.
- (6) Elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of buildings or of the level to which a structure is to be floodproofed.
- (7) For structures being improved or rebuilt, the estimated cost of improvements and market value of the structure prior to the improvements.
- (8) Such other information as the Administrator deems reasonably necessary (e.g., drawings or a site plan) for the purpose of this ordinance.

C. Action on Permit Application. The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this ordinance and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the City Council.

D. Construction and Use To Be As Provided In Application and Plans. Floodplain development permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this ordinance. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, building floor elevations, floodproofing, or other flood protection measures were accomplished in compliance with the provisions of this ordinance, prior to the use or occupancy of any structure.

160.05 FLOODPLAIN MANAGEMENT STANDARDS.

1. General Floodplain Standards. All development must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where base flood elevations have not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to determine (i) whether the land involved is either wholly or partly within the floodway or floodway fringe and (ii) the base flood elevation. Until a regulatory floodway is designated, no development may increase the Base Flood Elevation more than one (1) foot. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

Review by the Iowa Department of Natural Resources is not required for the proposed construction of new or replacement bridges or culverts where (i) the bridge or culvert is located on a stream that drains less than two (2) square miles, and (ii) the bridge or culvert is not associated with a channel modification that constitutes a channel change as specified in 567-71.2(2), Iowa Administrative Code.

A. All development within the special flood hazard areas shall:

- (1) Be designed and adequately anchored to prevent flotation, collapse or lateral movement.
- (2) Use construction methods and practices that will minimize flood damage.
- (3) Use construction materials and utility equipment that are resistant to flood damage.

B. Residential Structures. All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the base flood elevation. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the base flood elevation and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers or extended foundations) may be allowed (subject to favorable consideration by the City Council), where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

- (1) All new residential structures located in areas that would become isolated due to flooding of surrounding ground shall be provided with a means of access that will be passable by wheeled vehicles during the base flood. However, this criterion shall not apply where the Administrator determines there is sufficient flood warning time for the protection of life and property. When estimating the flood warning time, consideration shall be given to the criteria listed in 567-75.2(3), Iowa Administrative Code.

C. Non-Residential Structures. All new or substantially improved non-residential structures shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the base flood elevation, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the base flood; and that the structure, below the base flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator.

D. All New and Substantially Improved Structures.

- (1) Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

- a. A minimum of two (2) openings, with positioning on at least two (2) walls, having a total net area of not less than

one square inch for every square foot of enclosed area subject to flooding shall be provided.

b. The bottom of all openings shall be no higher than one foot above grade.

c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

d. Where the distance between the floor and ceiling of the fully enclosed area below the "lowest floor" is (five (5)) feet or more, the applicant shall be required to sign and record with the Butler County Recorder a Non-Conversion Agreement that ensures the lower enclosed area remains compliant with the criteria outlined in 160.05(1)(D)(1).

(2) New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

(3) New and substantially improved structures shall be constructed with electrical, heating, ventilation, plumbing, air conditioning equipment and other service facilities (including ductwork) elevated or floodproofed to a minimum of one (1) foot above the base flood elevation.

E. Factory-Built Homes.

(1) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the base flood elevation.

(2) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. Anchorage systems may include, but are not limited to, use of over-the-top or frame ties to ground anchors as required by the State Building Code.

F. Utility and Sanitary Systems.

(1) On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

(2) All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the base flood elevation.

(3) New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the base flood elevation.

(4) Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

G. **Storage of Materials and Equipment.** Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the base flood elevation. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.

H. **Flood Control Structural Works.** Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from the base flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

I. **Watercourse Alterations or Relocations.** Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

J. **Subdivisions.** Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the base flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include base flood elevation data for those areas located within the Special Flood Hazard area.

K. **Accessory Structures to Residential Uses.**

(1) Detached garages, sheds, and similar structures that are incidental to a residential use are exempt from the base flood elevation requirements where the following criteria are satisfied:

a. The structure shall be designed to have low flood damage potential. Its size shall not exceed 600 sq. ft. in size. Those portions of the structure located less than 1 foot above the base flood elevation must be constructed of flood-resistant materials.

b. The structure shall be used solely for low flood damage potential purposes such as vehicle parking and

limited storage. The structure shall not be used for human habitation.

c. The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.

d. The structure shall be firmly anchored to resist flotation, collapse and lateral movement.

e. The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the base flood elevation.

f. The structure's walls shall include openings that satisfy the provisions of 160.05(1)(D)(1) of this ordinance.

(2) Exemption from the base flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

L. Recreational Vehicles.

(1) Recreational vehicles are exempt from the requirements of 160.05(1)(E) of this ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied:

a. The recreational vehicle shall be located on the site for less than 180 consecutive days, and,

b. The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

(2) Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of 160.05(1)(E) of this ordinance regarding anchoring and elevation of factory-built homes.

M. Pipeline River and Stream Crossings. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

N. Maximum Damage Potential Development. All new or substantially improved maximum damage potential development shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the elevation of the 500-year flood, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 0.2% annual chance flood; and that the structure, below the 0.2% annual chance flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to

which any structures are floodproofed shall be maintained by the Administrator. Where 0.2% chance flood elevation data has not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determinations.

2. Special Floodway Provisions. In addition to the General Floodplain Standards, development within the floodway must meet the following applicable standards. The floodway is that portion of the floodplain which must be protected from developmental encroachment to allow the free flow of flood waters. Where floodway data has been provided in the Flood Insurance Study, such data shall be used to define the floodway. Where no floodway data has been provided, the Department of Natural Resources shall be contacted to provide a floodway delineation. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

A. No development shall be permitted in the floodway that would result in any increase in the base flood elevation. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.

B. All development within the floodway shall:

(1) Be consistent with the need to minimize flood damage.

(2) Use construction methods and practices that will minimize flood damage.

(3) Use construction materials and utility equipment that are resistant to flood damage.

C. No development shall affect the capacity or conveyance of the channel or floodway of any tributary to the main stream, drainage ditch or any other drainage facility or system.

D. Structures, buildings, recreational vehicles, and sanitary and utility systems, if permitted, shall meet the applicable general floodplain standards and shall be constructed or aligned to present the minimum possible resistance to flood flows.

E. Buildings, if permitted, shall have a low flood damage potential and shall not be for human habitation.

F. Storage of materials or equipment that are buoyant, flammable, explosive or injurious to human, animal or plant life is prohibited. Storage of other material may be allowed if readily removable from the floodway within the time available after flood warning.

G. Watercourse alterations or relocations (channel change and modifications) must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

H. Any fill allowed in the floodway must be shown to have some beneficial purpose and shall be limited to the minimum amount necessary.

- I. Pipeline river or stream crossings shall be buried in the streambed and banks or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering or due to the action of flood flows.

160.06 VARIANCE PROCEDURES.

1. The City Council may authorize upon request in specific cases such variance from the terms of this ordinance that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards:

- A. Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

- B. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood would result. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.

- C. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

- D. In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this ordinance, the applicant shall be notified in writing over the signature of the Administrator that : (i) the issuance of a variance will result in increase premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increase risks to life and property.

- E. All variances granted shall have the concurrence or approval of the Department of Natural Resources.

2. Factors Upon Which The Decision of the City Council Shall Be Based. In passing upon applications for variances, the Council shall consider all relevant factors specified in other sections of this ordinance and:

- A. The danger to life and property due to increased flood heights or velocities caused by encroachments.

- B. The danger that materials may be swept on to other land or downstream to the injury of others.

- C. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.

- D. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.

- E. The important of the services provided by the proposed facility to the City.
 - F. The requirements of the facility for a floodplain location.
 - G. The availability of alternative locations not subject to flooding for the proposed use.
 - H. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
 - I. The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.
 - J. The safety of access to the property in times of flood for ordinary and emergency vehicles.
 - K. The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.
 - L. The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.
 - M. Such other factors which are relevant to the purpose of this ordinance.
3. Conditions Attached to Variances. Upon consideration of the factors listed above, the City Council may attach such conditions to the granting of variances as it deems necessary to further the purpose of this ordinance. Such conditions may include, but not necessarily be limited to:
- A. Modification of waste disposal and water supply facilities.
 - B. Limitation of periods of use and operation.
 - C. Imposition of operational controls, sureties, and deed restrictions.
 - D. Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this ordinance.
 - E. Floodproofing measures shall be designed consistent with the flood protection elevation for the particular area, flood velocities, duration, rate of rise, hydrostatic and hydrodynamic forces, and other factors associated with the regulatory flood. The Council shall require that the applicant submit a plan or document certified by a registered professional engineer that the floodproofing measures are consistent with the regulatory flood protection elevation and associated flood factors for the particular area.

160.07 NONCONFORMING USES.

- 1. A structure of the use of a structure or premises which was lawful before the passage or amendment of this ordinance, but which is not in conformity with the provisions of this ordinance, may be continued subject to the following conditions:
 - A. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this ordinance.

B. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.

C. In any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.

2. Except as provided in 160.07(1)(B), any use which has been permitted as a variance shall be considered a conforming use.

160.08 PENALTIES FOR VIOLATION. Violations of the provisions of this ordinance or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500.00 (five hundred dollars) or imprisoned for not more than 30 (thirty) days. Nothing herein contained prevent the City of Clarksville from taking such other lawful action as is necessary to prevent or remedy violation.

160.09 AMENDMENTS. The regulations and standards set forth in this ordinance may from time to time be amended, supplemented, changed, or repealed. No amendment, supplement, change, or modification shall be undertaken without prior approval from the Department of Natural Resources.

165.01 DEFINITIONS. For the purpose of this chapter, the following words and terms are defined.

1. “Plat” means a map, drawing or chart of a subdivision.
2. “Subdivision” means the division of a lot, tract or parcel of land into three or more lots, plots, sites or other divisions of land, for the purpose, whether immediate or future, of sale or building development. It also includes resubdivision of land or lots.

165.02 PRELIMINARY PLAT REQUIRED. Whenever the owner of any tract or parcel of land desires to subdivide or re-subdivide into three or more building sites, said person shall file a preliminary plat, in triplicate, together with a written statement specifying such person’s intentions respecting the character of the proposed development, deed restrictions, condition of abstract title, drainage, parks and playgrounds and the intended date of beginning development, with the City. Two copies of the plat and other required information shall be referred by the Clerk to the Council for its preliminary study and approval.

165.03 CONTENTS OF PRELIMINARY PLAT. The preliminary plat shall be drawn to a scale not less than one inch to 100 feet and shall show the proposed location and width of streets and alleys, lot lines and area of each lot. The plan shall also show surrounding streets, lots, watercourses and sewer or water mains. Wherever the land is so rolling or rugged that the preliminary location and grades of streets and sewer cannot properly be considered, the Council may require the developer to provide a topographical map of the property showing contour intervals of not less than five feet. At the time the preliminary plat is filed, the subdivider shall show the location of all utilities that will service the area and the planned extension thereof within the subdivision. Utilities are defined as electric, telephone, gas, water, sanitary sewers, storm drains, sidewalks and curb and gutter.

165.04 PRELIMINARY PLAT APPROVAL. The Council shall approve or reject the preliminary plat and plan within 30 days after submission thereof. Approval of the preliminary plat and plan constitutes authorization to proceed with the preparation of the final plat, but the final plat and plan must be submitted to the Council for approval, as provided in this chapter.

165.05 FINAL PLAT. The subdivider shall file with the Clerk for submission to the Council six copies of the final plat, which in addition to the general requirements specified for the preliminary plat, shall show the following data and information:

1. The boundaries of the property.
2. The lines of all proposed streets and alleys, with their widths and names, and other areas to be dedicated to public use.

3. The lines of adjoining streets and alleys, with their widths and names.
4. All lot lines and easements with figures showing their dimensions.
5. All dimensions, both lineal and angular.
6. Radii, arcs and chords, points of tangency, central angles for all circilinear streets and radii for all rounded corners.
7. All monuments together with their description.
8. Title and description of property subdivided showing its location and extent, points of compass, scale of plan, name of subdivider, and name of engineer staking the lots.
9. Profiles may be required of any streets.

165.06 OTHER FILINGS. The subdivider shall also file with the final plat all the acknowledgments, certificates and opinions as required by law, as well as a statement of all private restrictions.

165.07 APPROVED COPY FILING. After approval of the final plat and plan by the Council, two copies of the final plat and the plan shall be filed in the office of the Clerk and the office of the County Recorder.

165.08 MINIMUM STANDARDS OF DESIGN AND DEVELOPMENT. No preliminary plat or final plat of a subdivision shall be approved by the Council unless it conforms to the minimum standards and requirements contained in this section.

1. Street Access. Every lot in a proposed subdivision shall be served by a publicly dedicated street.
2. Continuation of Streets. The arrangement of streets in new subdivisions shall make provision for the continuation of the principal existing streets adjoining additions, insofar as they may be necessary for public requirements. However, adjoining developments of unequal character shall not be united with connecting streets where the connection would adversely affect property values, unless it is deemed necessary in the public interests. Wherever there exists a dedicated or platted half street or alley adjacent to the tract to be subdivided, the other half of the street or alley shall be platted.
3. Street Widths. Street widths shall be designed in accordance with their character and use. Minimum rights-of-way shall be:
 - A. Major arteries and parkways, 100 feet.
 - B. Secondary and main thoroughfares, 80 feet.
 - C. Neighborhood residential streets, 60 feet.
 - D. Minor residential streets, 60 feet.
4. Intersections. Streets shall intersect main thoroughfares adjacent to the subdivision at right angles, and intersections within the subdivision shall be as nearly at right angles as may seem practical.
5. Curved Streets. The location of all curved streets shall be so designed as to fit the natural topography as closely as possible and to make possible desirable land subdivision and safe vehicular traffic.

6. Centerline Radii of Streets. Minimum centerline radii of curved minor residential streets shall be not less than 100 feet and the centerline radii of curved major and secondary thoroughfares shall be not less than 300 feet.
7. Terminal Streets. Terminal residential streets or cul-de-sacs may be established where necessary to afford access to all lots. No terminal street may be platted longer than 500 feet and all such terminal streets shall terminate in a circular open space having a minimum diameter of 100 feet.
8. Street Names. Street names may be indicated but shall not duplicate or resemble too closely names of existing streets. Where the platted street is a logical extension of an existing street, the name of the existing street shall be used.
9. Alleys. Alleys in residential blocks shall be a minimum width of 16 feet. Alleys are not recommended for residential areas except where properties front on a major thoroughfare or where they seem necessary as a continuation of an existing alley system. Alleys are required in the rear of all business lots and shall be a minimum width of 20 feet.
10. Utility Easements. Where alleys are not provided, easements of not less than five feet in width shall be provided on each side of all rear lot lines, and side lines where necessary, for utility lines. Easements of greater width may be required along lines or across lots where necessary for the extension of main sewers and similar utilities.
11. Blocks. No block shall be longer than 1,000 feet between street lines. The width of blocks shall not be less than 200 feet and not more than 300 feet, except when it is desired to provide a development containing large residential lots, the Council may modify the requirements.
12. Lot Size. Lots in new subdivisions where City water and sewer connections are contemplated shall meet the following minimum requirements:
 - A. 66-foot frontage on street property line where lot is rectangular; 50-foot frontage on curving streets.
 - B. 120 feet in depth.
 - C. 8,400 square feet in area.
13. Corner Lots. Corner lots shall have not less than five feet extra width to permit adequate building setback on both streets.
14. Side Lot Lines. All side lines of lots shall be at right angles to straight street lines, or radial to curved street lines, unless a variation to this requirement will give a better street or lot plan.
15. Corner Markers. All lots shall have a permanent marker at each corner.

165.09 IMPROVEMENTS. Before any portion of the final plat of any subdivision is finally approved for recording, the subdivider shall make and install, at the subdivider's expense, all the improvements required in this section, in that portion of the plat which is to be finally recorded. In lieu of final completion of the minimum improvements before the plat is finally approved, the subdivider may post a bond approved by the Council, which bond will insure to the City that the improvements will be completed by the subdivider within one year (or any period of time mutually agreed upon by the subdivider and the Council) after final approval of the plat and plan. The bond to be provided may be in the form of a subdivider's

bond or a construction contract performance bond. The amount of the bond shall not be less than the estimated cost of the improvements, and the amount of the estimates must be approved by the Council. If the improvements are not completed within the specified time, the Council may use the bond or any necessary portion thereof, to complete the improvements. The required improvements and additional requirements pertaining to improvements are as follows:

1. Work Required. The subdivider shall perform the following work:
 - A. Install sanitary sewers and individual lot services from the main to the lot line as specified by the City upon recommendation of the City engineer.
 - B. Install water mains, valves, hydrants and individual lot services from the main to the lot line as specified by the City upon recommendation of the City engineer.
 - C. Install storm drains, if necessary and required.
 - D. Bring all streets to an established grade.
 - E. Install curb and gutter, and cross gutters where required.
 - F. Furnish and place six inches of crushed rock base in all streets.
 - G. Install sidewalks in accordance with City specifications unless this sidewalk requirement is waived by the Council.
2. Engineer Supervision. All improvements shall be designed and the construction thereof shall be supervised by a licensed engineer.
3. Plans. All improvements shall be presented to the Council in the form of plans and specifications for their approval before any work thereon is performed. Upon completion, the work will be inspected by the Council and accepted or corrections ordered as required to meet the approved specifications. After formal acceptance, the City will assume maintenance responsibilities. However, any damage to completed and accepted improvements caused by the subdivider shall be corrected at the subdivider's expense.
4. Use of Public Property. No planting, gateway, entrance or similar improvements shall be made on public property except with the permission and approval of the Council.
5. Street Surfacing. The City will install the all-weather surfacing on all streets in accordance with traffic requirements. In no case shall this be less than a prime coat and a single application of bituminous inverted penetration wearing surface.
6. Increased Water and Sewer Line Size. Where necessary for future development the City may require larger than the minimum sizes specified for water and sewer pipe.

165.10 MODIFICATIONS. Whenever the tract to be subdivided is of such unusual size or shape or is surrounded by such development or unusual conditions that the strict application of some section or subsection of this chapter would result in real difficulties and substantial hardships, the Council may vary or modify the requirements so that the subdivider is allowed to develop the property in a reasonable manner, but at the same time the public welfare and interests of the City must be protected and the general intent and spirit of this chapter preserved.

APPENDIX TO CODE OF ORDINANCES

USE AND MAINTENANCE OF THE CODE OF ORDINANCES

The following information is provided to assist in the use and proper maintenance of this Code of Ordinances.

DISTRIBUTION OF COPIES

1. OFFICIAL COPY. The “OFFICIAL COPY” of the Code of Ordinances must be kept by the City Clerk and should be identified as the “OFFICIAL COPY.”

2. DISTRIBUTION. Other copies of the Code of Ordinances should be made available to all persons having a relatively frequent and continuing need to have access to ordinances which are in effect in the City as well as reference centers such as the City Library, County Law Library, and perhaps the schools.

3. SALE. The sale or distribution of copies in a general fashion is not recommended as experience indicates that indiscriminate distribution tends to result in outdated codes being used or misused.

4. RECORD OF DISTRIBUTION. The City Clerk should be responsible for maintaining an accurate and current record of persons having a copy of the Code of Ordinances. Each official, elected or appointed, should return to the City, upon leaving office, all documents, records and other materials pertaining to the office, including this Code of Ordinances.

(Code of Iowa, Sec. 372.13[4])

NUMBERING OF ORDINANCES AMENDING THE CODE OF ORDINANCES

It is recommended that a simple numerical sequence be used in assigning ordinance numbers to ordinances as they are passed. For example, if the ordinance adopting the Code of Ordinances is No. 163, we would suggest that the first ordinance passed changing, adding to, or deleting from the Code be assigned the number 164, the next ordinance be assigned the number 165, and so on. We advise against using the Code of Ordinances numbering system for the numbering of ordinances.

RETENTION OF AMENDING ORDINANCES

Please note that two books should be maintained: (1) the Code of Ordinances; and (2) an ordinance book. We will assist in the maintenance of the Code of Ordinances book, per the Supplement Agreement, by revising and returning appropriate pages for the Code of Ordinances book as required to accommodate ordinances amending the Code. The City Clerk is responsible for maintaining the ordinance book and must be sure that an original copy of each ordinance adopted, bearing the signatures of the Mayor and Clerk, is inserted in the ordinance book and preserved in a safe place.

SUPPLEMENT RECORD

A record of all supplements prepared for the Code of Ordinances is provided in the front of the Code. This record will indicate the number and date of the ordinances adopting the original Code and of each subsequently adopted ordinance which has been incorporated in the Code. For each supplemented ordinance, the Supplement Record will list the ordinance number, date, topic, and chapter or section number of the Code affected by the amending ordinance. A periodic review of the Supplement Record and ordinances passed will assure that all ordinances amending the Code have been incorporated therein.

DISTRIBUTION OF SUPPLEMENTS

Supplements containing revised pages for insertion in each Code will be sent to the Clerk. It is the responsibility of the Clerk to see that each person having a Code of Ordinances receives each supplement so that each Code may be properly updated to reflect action of the Council in amending the Code.

AMENDING THE CODE OF ORDINANCES

The Code of Ordinances contains most of the laws of the City as of the date of its adoption and is continually subject to amendment to reflect changing policies of the Council, mandates of the State, or decisions of the Courts. Amendments to the Code of Ordinances can only be accomplished by the adoption of an ordinance.

(Code of Iowa, Sec. 380.2)

The following forms of ordinances are recommended for making amendments to the Code of Ordinances:
